## 3 Basic L<sup>A</sup>T<sub>E</sub>X Syntax

### 3.1 Document Structure

A typical L<sup>A</sup>T<sub>E</sub>X document consists of three main parts:

- **Preamble:** The preamble comes before the `\begin{document}` command and is used to define the document class, load packages, and set various settings.
- **Document Class:** The document class specifies the type of document you're creating (e.g., article, report, book) and sets the overall layout and formatting.
- **Packages:** Packages extend the functionality of L<sup>A</sup>T<sub>E</sub>X by providing additional commands and features. They are included in the preamble using the `\usepackage{}` command.

## 3.2 Creating Sections, Subsections, and Paragraphs

In L<sup>A</sup>T<sub>E</sub>X, you can organize your document into sections, subsections, and paragraphs using the following commands:

```
\section{Section Title}
\subsection{Subsection Title}
\subsubsection{Subsubsection Title}
```

## 3.3 Formatting Text

You can format text in L<sup>A</sup>T<sub>E</sub>X by applying various font styles, sizes, and colors. Here are a few examples:

- **Font Styles:** *italic*, **bold**, `typewriter`, underlined.
- **Font Sizes:** `tiny`, `scriptsize`, `footnotesize`, `small`, `normalsize`, `large`, `Large`, `LARGE`, `huge`, `Huge`.
- **Font Colors:** You can use the `xcolor` package to define custom colors and apply them to your text.

## 3.4 Adding Tables, Figures, and Equations

L<sup>A</sup>T<sub>E</sub>X provides environments for creating tables, figures, and equations:

- **Tables:** The `tabular` environment is used to create tables with rows and columns.
- **Figures:** The `figure` environment is used to include images and captions in your document.
- **Equations:** Mathematical equations can be typeset using either inline math mode (`$...$`) or display math mode (`$$...$$` or `equation` environment).

These are just some of the basic elements and syntax in L<sup>A</sup>T<sub>E</sub>X. There are many more features and commands available to explore.

# 4 Advanced L<sup>A</sup>T<sub>E</sub>X Features

## 4.1 Cross-referencing and Citations

L<sup>A</sup>T<sub>E</sub>X allows you to easily reference sections, figures, tables, and equations within your document using labels and cross-referencing. You can also manage citations and create bibliographies using BibTeX or BibLaTeX.

## 4.2 Mathematical Typesetting and Symbols

One of the strengths of L<sup>A</sup>T<sub>E</sub>X is its exceptional support for mathematical typesetting. You can typeset mathematical expressions, equations, and symbols using various environments, such as `equation`, `align`, and `gather`.
